Software Engineer

We are looking for a full-time software engineer to join the Idibon team in our sunny San Francisco offices. We are a startup, so this is a great chance to get in on the ground floor of a growing company that is looking to have a sustained, positive impact on the world. We're eight floors above Powell BART with adjacent parking.

You will be joining a six-person team developing cutting-edge language technologies and artificial intelligence. Our founding team has some of the most experienced people in natural language processing, machine learning, crowdsourcing, and managing information in multiple languages. Being part of this team will be a great chance to learn about these data science skills, plus astronomy, bicycle touring, hockey, emoticons, and furniture design. We are a for-profit company but we also have a strong social-good agenda, having worked in disaster response world-wide. We are already prominent in our industry, backed by *Khosla Ventures* and recently featured in media like *NPR's Morning Edition* and *GigaOm*. See our site (idibon.com) for more about who we are and what we do.

Required skills:
* Software engineering in high-level and low-level languages (ideally Ruby and Java)
* Bachelors in Computer Science
* Experience with relational databases like MySQL or PostgreSQL
* Experience building web services
* Experience with Git or a similar version control system
* Interest in linguistics, machine-learning, or working with data in multiple languages
* 2-5 years work experience

Bonus points in your favor:
* Masters in Computer Science
* Other high-level languages (e.g. Python, Scala, JavaScript, Clojure)
* You have used Hadoop or Storm for something interesting
* Experience with NoSQL databases
* You've provisioned Vagrant with Chef or Puppet
* You test first and write documentation
* Community participation, particularly an active *Github* or *Stack Overflow* account
* You have previously worked at the intersection of language and technology

Salary is commensurate with experience. Employees receive generous health and lifestyle benefits. We only have one open position right now, but if you have more experience than required, let us know and we might be able to turn this into a more senior role with appropriate compensation and equity incentives.

If you are interested or have any questions, please contact us at info@idibon.com
